

Serial No. 09/941,438

In the Specification:

Paragraph 0024:

a1 [0024] By "trypsin resistance" is meant the ability of the dispersed tissue matrix to resist digestion by trypsin. When trypsin resistance is stated in terms of a percentage, this refers to the amount of tissue which remains undigested when exposed to 2% trypsin at 37°C for 6-24 hours.
